User manual for admin :

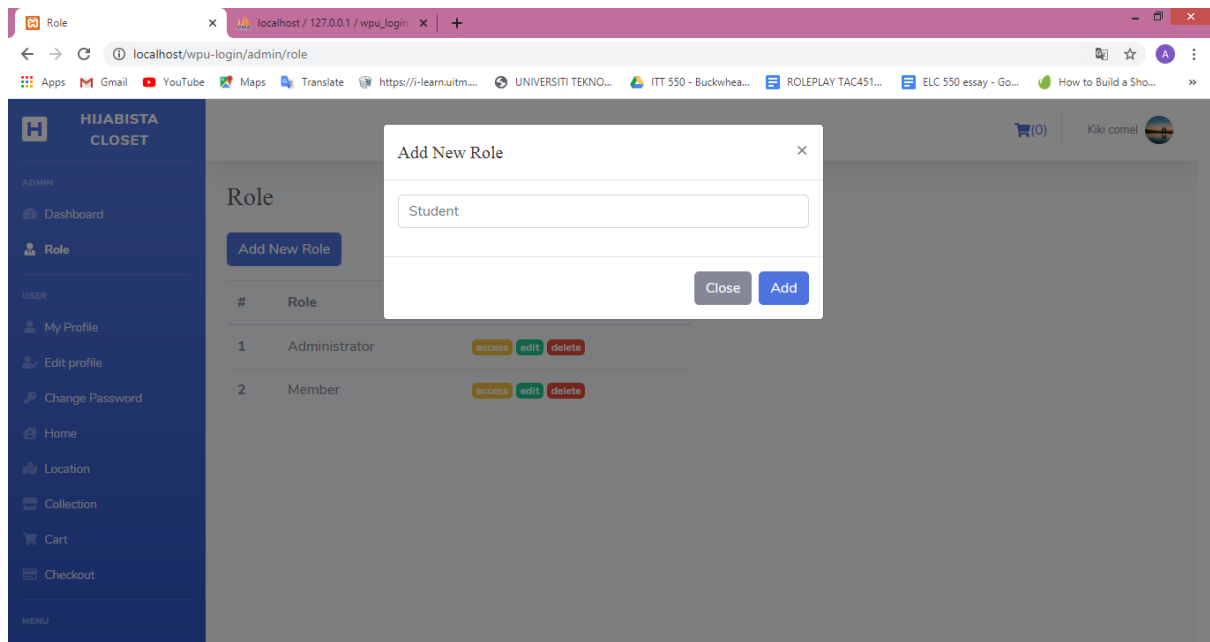

The admin can login the website same like the user login. The menu in user are slightly different from the menu in admin. The admin of the website is Kiki Cornel. The menu in admin have dashboard and role. The customer cannot see the admin menu.

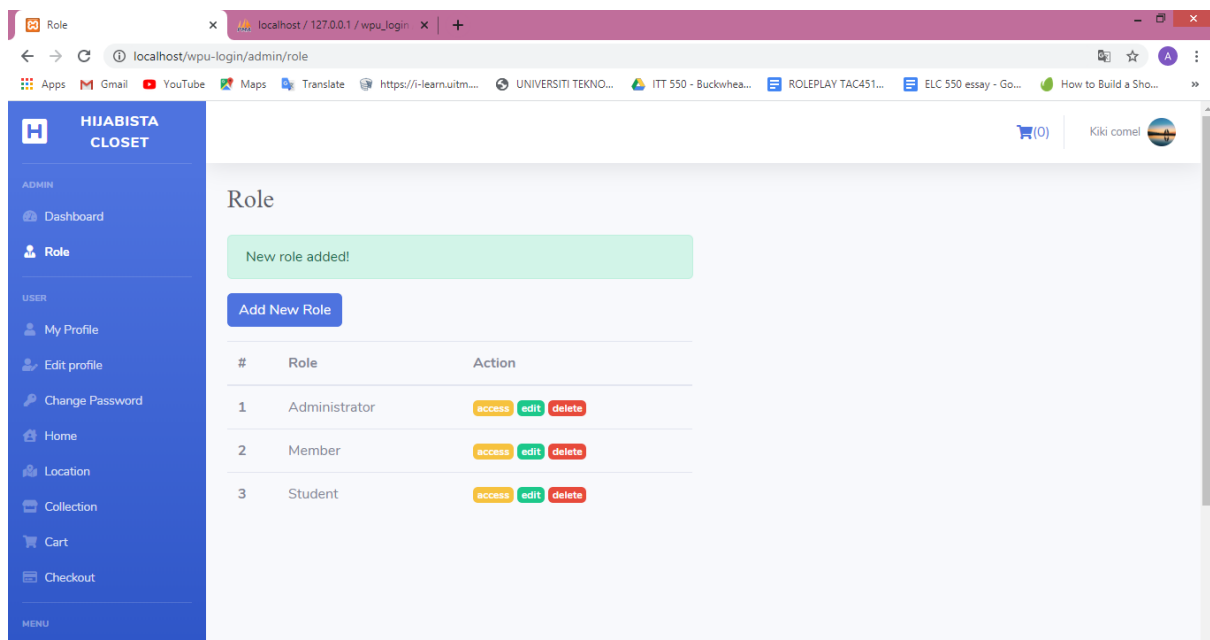

The admin can add new role in the website.

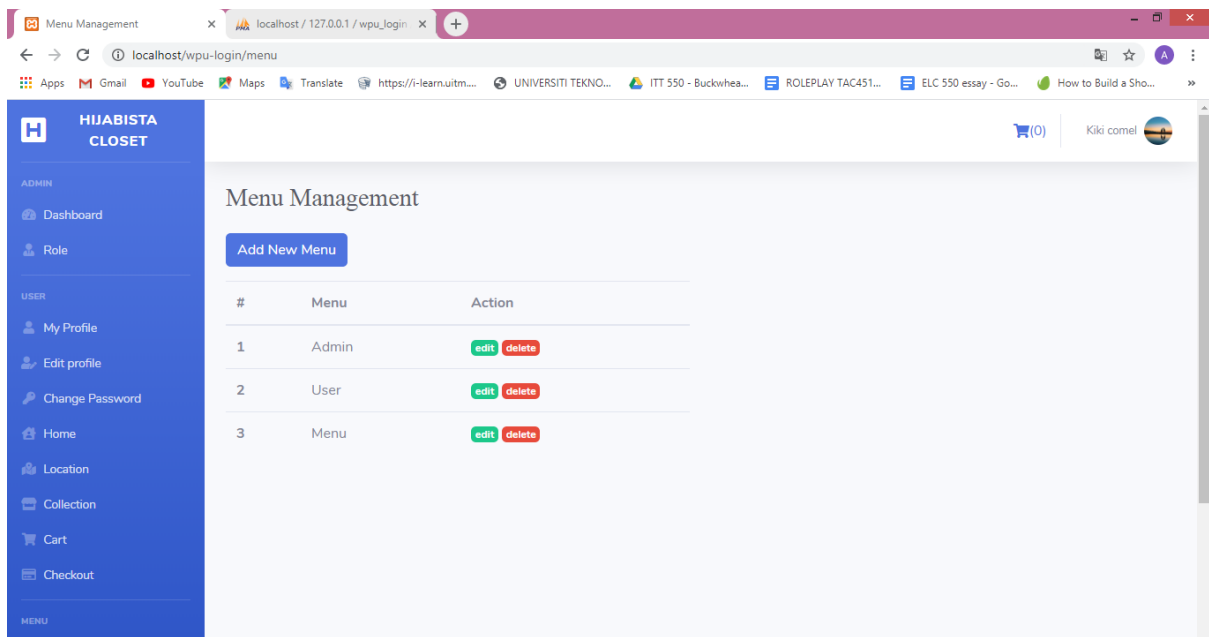

For example, the admin decided to add new role and the role that want to be added is student role.

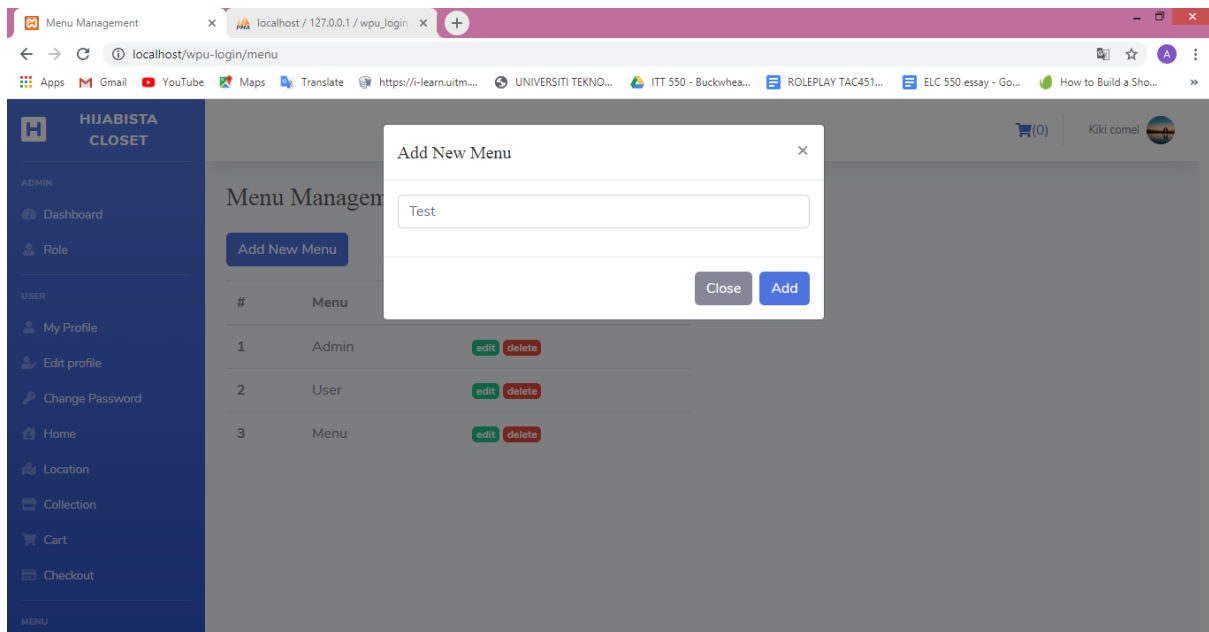

And the student role have successfully added in the role.

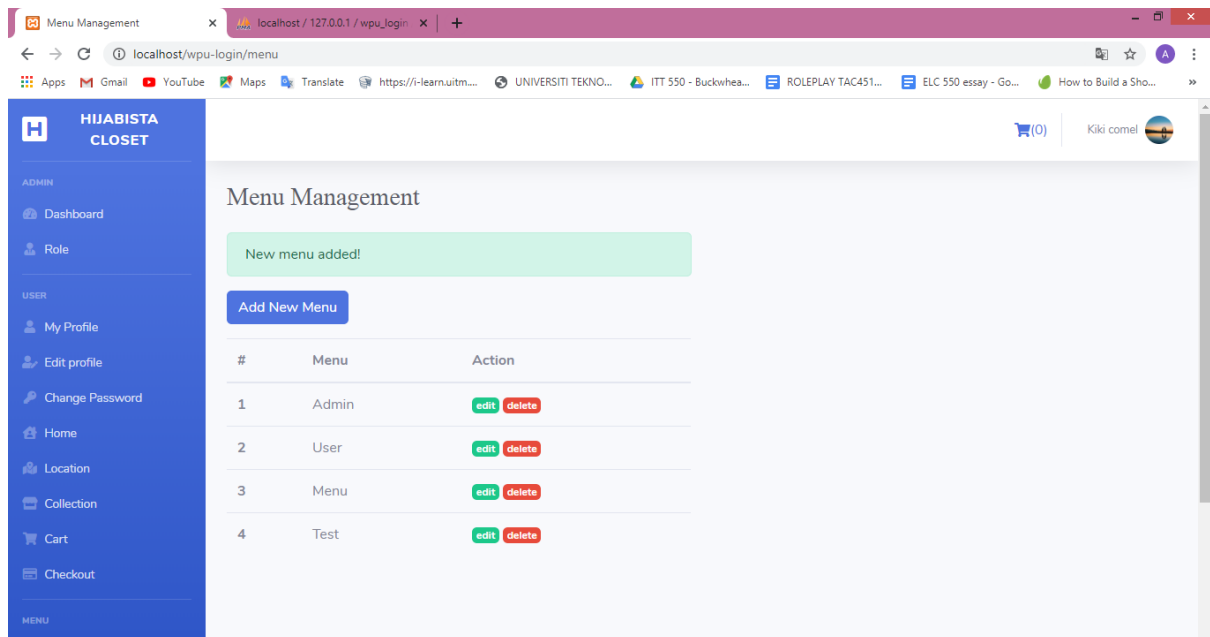

Then, the admin can add new menu in menu management.

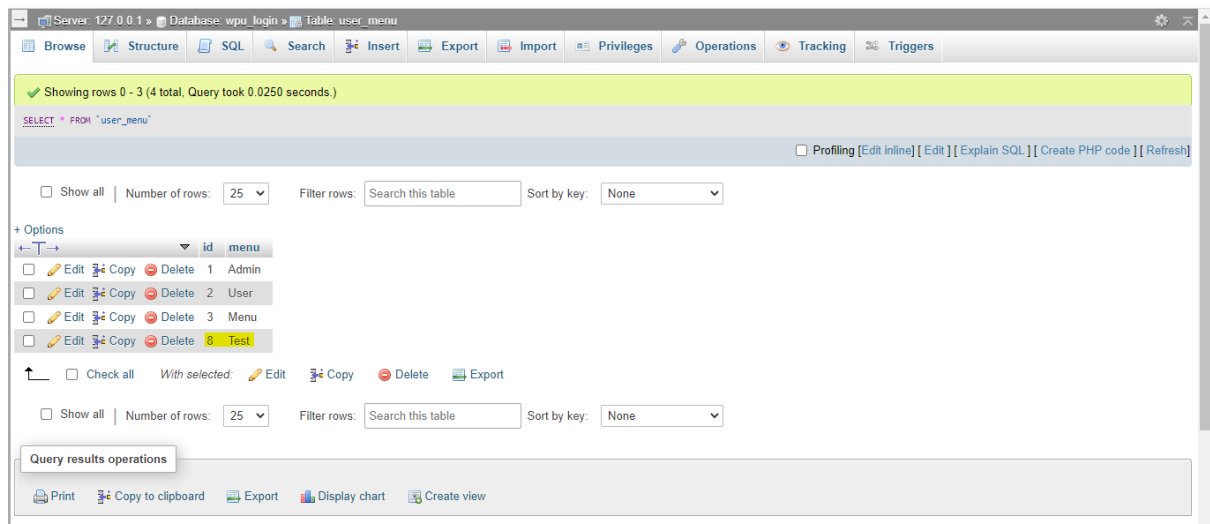

For example, the admin want to add new menu and the new menu name is Test. The admin have to click the button add to add new menu.

Then the new menu that have been named as Test have successfully added to menu management.

Then, it will updated automatically in database phpMyAdmin.

The admin can add new submenu in submenu management.

The screenshot shows the 'Submenu Management' page. On the left is a sidebar with a blue header 'HIJABISTA CLOSET' and a navigation menu. The main content area has a title 'Submenu Management' and a blue button 'Add New Submenu'. Below this is a table with 8 columns: #, Sub Menu, Menu, Url, Icon, Active, and Action. The table lists 8 existing submenus.

#	Sub Menu	Menu	Url	Icon	Active	Action
1	Dashboard	Admin	admin	fas fa-fw fa-tachometer-alt	1	<a href="#">edit</a> <a href="#">delete</a>
2	My Profile	User	user	fas fa-fw fa-user	1	<a href="#">edit</a> <a href="#">delete</a>
3	Edit profile	User	user/edit	fas fa-fw fa-user-edit	1	<a href="#">edit</a> <a href="#">delete</a>
4	Menu Management	Menu	menu	fas fa-fw fa-folder	1	<a href="#">edit</a> <a href="#">delete</a>
